GK Income Builder Fund (GKIBF)

Fund Overview

Fund Name: GoldKach Income Builder Fund
Fund Type: Income-Focused Balanced Fund
Investment Style: Income Generation and Capital Preservation
Inception Date: 30/09/2024
Domicile: Uganda
Management Fee: 2%
Currency: USD

Investment Objective

The GoldKach Income Builder Fund seeks to provide a stable and sustainable income stream with modest capital appreciation by investing in a diversified portfolio of U.S. dividend-paying equities, senior secured loans, and high-yield corporate bonds. The fund targets assets that offer above-average income potential, balancing credit risk with robust income generation.

Fund Composition

The GoldKach Income Builder Fund is comprised of three core ETFs that focus on generating consistent income:

- Invesco Senior Loan ETF

Focus: Senior Secured Loans
Description: The Invesco Senior Loan ETF invests in a diversified portfolio of senior secured loans issued by corporations. Senior loans typically provide higher yields than traditional bonds and are secured by corporate assets, reducing default risk.

- Schwab U.S. Dividend Equity ETF

Focus: Dividend-Paying U.S. Stocks
Description: The Schwab U.S. Dividend Equity ETF invests in large-cap U.S. companies with a history of consistent and reliable dividend payments. This ETF aims to provide investors with a steady income stream along with capital appreciation from blue-chip stocks.

- iShares iBoxx $ High Yield Corporate Bond ETF

Focus: High-Yield Corporate Bonds
Description*: The iShares iBoxx $ High Yield Corporate Bond ETF provides exposure to a diversified portfolio of high-yield corporate bonds. High-yield bonds offer higher interest rates, which increase the potential income of the fund, albeit with elevated credit risk.

Fund Strategy

The GoldKach Income Builder Fund adopts a multi-asset strategy with a focus on income generation. By investing in dividend-paying stocks, senior loans, and high-yield bonds, the fund aims to maximize income for investors while maintaining a balance between risk and capital preservation. The senior loans offer credit protection through their secured nature, while high-yield corporate bonds and dividend-paying stocks contribute to both income and growth potential.

Performance Highlights

Ticker	Annualised Performance				Divideds
Period	1 Yr	3 Yrs	5 Yrs	10 Yrs	Annual

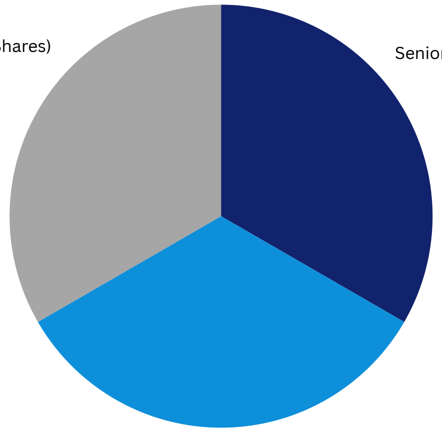
GK Income Builder Fund

Sector Allocation



Why Invest in GoldKach Income Builder Fund?

Steady Income**:** The fund combines three income-generating assets—senior loans, high-yield bonds, and dividend-paying stocks—to deliver consistent monthly or quarterly distributions.

Balanced Risk**:** The inclusion of senior secured loans reduces the risk associated with traditional high-yield bond funds, while still providing attractive yields.

Diversified Income Sources**:** The blend of dividend income from equities and interest income from bonds and loans offers a diversified approach to income generation.

Capital Preservation**:** Senior loans offer lower default risk due to their secured status, while blue-chip dividend stocks provide stable income and potential for growth.

Distribution Frequency

The GoldKach Income Builder Fund aims to make distributions on a semi-annual basis, with the option for reinvestment.

Risk Considerations

Credit Risk**:** Exposure to high-yield corporate bonds and senior loans introduces credit risk.

Interest Rate Sensitivity**:** Changes in interest rates can impact bond and loan prices, potentially reducing capital values.

Equity Market Risk**:** The portion of the portfolio invested in equities may fluctuate in value with market conditions.
